

Dear Wayne,

I am happy we made the change to the Beacon software; it is so suited to our practice. About 85% of our clients are court-referred and Beacon provides assistance in timely reporting to the referral source.

Our front office staff are enthusiastic about the way Beacon organizes client data making charge and payment entry easy and fast. With all pertinent information in one database, end-of-the-month reports are a breeze to prepare just press the button & print.

The report reminder ensures we are not missing any interim reports and the court officers are pleased that they are receiving the reports earlier so they can incorporate timely information about the clients in “their reports”.

Beacon reduces duplication of info and additional paper copies. It really helps with HIPAA compliance.

Great Software!
